PROFESSIONAL SUMMARY

2027 B.Tech CSE student building web applications, developer tooling, and applied AI integrations with an emphasis on practical implementation and deployment. Foundation in HTML, CSS, JavaScript, SQL, and core CS principles, with hands-on project experience using React, TypeScript, Node.js, relational databases, and modern developer workflows.

EDUCATION

Dronacharya Group of Institutions

B.Tech in Computer Science and Engineering

Greater Noida, India

Expected May 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

TECHNICAL SKILLS

- **Languages & Core:** HTML5, CSS3, JavaScript (ES6+), SQL
- **Applied AI & APIs:** AI/LLM API Integration, Structured Outputs, AI Agent Concepts
- **Technologies Used in Projects:** React, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Supabase, Docker
- **Cloud & Developer Tools:** Git, GitHub, Vercel, Cloudflare Workers, Cloudflare D1

RESEARCH EXPERIENCE

Smart Sensing Air Stations with Advanced WSN and IoT Security

EASEC-19, Kuala Lumpur, Malaysia

Technical Research Delegation Member — Dronacharya Group of Institutions

July 2026

- Participated with the DGI student research delegation investigating Wireless Sensor Networks (WSN) and transmission security for environmental monitoring.
- Supported technical documentation, literature review, and architecture diagram preparation for the project presented at the 19th East Asia-Pacific Conference on Structural Engineering and Construction (EASEC-19).
- Examined edge-node communication constraints, data flow integrity, and network connectivity challenges across distributed IoT devices.

PROJECTS

AgentShield | AI-Agent Security & Policy Control Application

[GitHub](#) | [Live Demo](#)

- Built a developer-focused security application for evaluating potentially risky AI-coding-agent changes through repository scanning and policy-driven decisions.
- Developed a React dashboard and Express API for presenting scan findings, platform risk scores, approval states, remediation actions, and audit history.
- Configured deterministic scanners covering exposed tokens, Dockerfiles, Kubernetes manifests, AI-agent session logs, and dependency inventory.
- Integrated PostgreSQL schemas and Policy-as-Code workflows to classify findings into structured decisions (ALLOW, WARN, REQUIRE_APPROVAL, BLOCK) with persistent event logging.

NeuroInsight-AI | Non-Clinical Brain MRI Research Application

[GitHub](#)

- Developed an experimental, non-diagnostic research prototype demonstrating 2D brain-MRI classification and research-reporting workflows.
- Integrated an experimental ResNet50-based classification workflow with Grad-CAM attribution to visualize model attention regions within the user interface.
- Implemented research-oriented result handling, consent-controlled derived artifacts, and privacy-aware metadata workflows adhering to non-diagnostic boundaries.

ScopeLedger | B2B Project Scope Management SaaS

[GitHub](#) | [Ongoing](#)

- Building a full-stack web application designed for agencies to record scope creep, calculate pricing adjustments, and manage client approvals.
- Designed a structured workflow connecting client requests with impact reviews, pricing adjustments, approval transitions, and change history.
- Enforced workspace-based data separation using explicit workspace identifiers across database queries and application workflows.
- Built serverless backend routes using Cloudflare Workers and D1 database persistence, including structured CSV data export functionality.

CERTIFICATIONS & TRAINING

[\[Verify Certificates\]](#)

- **Claude Code in Action** – Anthropic [Verify](#) | Apr 2026
- **OS Basics, Networking Basics & Cybersecurity** – Cisco Networking Academy 2025 – 2026
- **Introduction to Software Testing** – Simplilearn SkillUp Mar 2026
- **British Airways Data Science Job Simulation** – Forage Mar 2026
